2019-09 -

Current

Associate of Applied Science:

Architectural And Building Technology

Humber College - Toronto, ON

Accomplishments

During a Back End course by Jonas Schmedtmann. We created a fully functional Website. Which has a Back End server built with NodeJs/ExpressJs. The website has a Authentication/Authorization system. Stripe is used to integrate as Payment gateway. MongoDB is used as a Database, Using the Mongoose library which performs the CRUD method. Although the website is not mobile friendly. It uses front end technology such as CSS/JS. The Website is hosted on Heroku and can be accessed at this address <https://farhan-natours.herokuapp.com/>
